ABOUT

Innovation and creation are the at the center of my every action. Nothing makes me happier than working on completely unique ways to solve a problem, and the feeling of success I achieve after completing an unprecedented project is the driving force in my life. I maintain a forward-facing focus, always thinking about the next steps I have to take to get where I want to go.

After trying my hand at several different jobs, I decided to change direction and learn how to code. From the moment I wrote my first JavaScript function, I knew that I had made a good choice. I got into a programming school and learned all the ins and outs of full stack web development - including React, Node, and SQL. I'm ready to charge into the future, armed with my newly found skills and deep passion for coding.

EDUCATION

DevMountain - Phoenix, AZ

Jun 2018 - Sep 2018

- Focused on full stack web development
- Primarily learned JavaScript, React, and Node.js
- Worked with SQL databases, Redux, Enzyme, and many other industry-specific technologies
- Practiced reading and understanding complex documentation
- Built React projects solo and as part of a team

Brigham Young University - Provo, UT

Sep 2013 - Apr 2016

- Studied Microbiology
- Minored in Music
- Participated in multiple sports programs
- Part of the BYU Symphony

WORK EXPERIENCE

FedEx Ground – Vineyard, UT

Jul 2017 - Mar 2018

- Operated a Freightliner P1200 class truck
- Responsible for delivery of FedEx packages in two Utah cities
- Met tight deadlines on a daily basis

KEY SKILLS

Core Abilities:
- Front end web development
- Back end web development
- Database manipulation
- Web styling

Technologies:
- React
- Node
- PostgreSQL
- Express
- RESTful API's
- Redux
- React Router
- Redis
- Nodemailer
- Cypress
- Enzyme
- Jest
- Chai
- SASS
- HTML 5
- CSS3
- NPM
- Git

Coding Languages:
- JavaScript
